El-Eryani, A. A. Linkage data on phen and tyr mutants.

The phenylalanine requiring mutants phen-2 (E5212) and phen-3 (Y 16329) are bath alleles at the same locus and are in the right arm of linkage group III at 2.2 map units to the left of tyr-1 (Y6994).

The tyrosine-requiring strain tyr-1 (Y6994) responds also to tryptophan and leucine just as phen-1 does.
